Cataract surgery and its complications Norman S Jaffe

Spontaneous iris bleeding during cataract surgery in a
January 26th, 2017 - Although Hay et al. and Jaffe et al. both published statistics on bleeding complications during cataract surgery based on retrospective reviews. They data was from a period when larger incisions were performed during cataract surgery therefore their data may not be fully applicable to complications related to modern surgical technique.

Cataract Surgery Recovery What to Expect
April 27th, 2019 - Complications with cataract surgery are rare and may include the worsening of your vision, bleeding or infection. Call your eye doctor right away if you experience any itching, pain, flashing lights, floaters, redness, severe headache, upset stomach, light sensitivity or watery eyes after surgery.

Potential Risks and Complications of Cataract Surgery
April 28th, 2019 - Cataract surgery is a very common procedure and is considered very safe but it is not without risks. In addition to the general risks of surgery and the risks associated with anesthesia, a cataract procedure poses its own unique potential complications.

Laser Posterior Capsulotomy procedure test removal
April 27th, 2019 - In 2013 I had cataract surgery on my right eye that unfortunately resulted in TASS which subsided in a few weeks. A few months later I had cataract surgery on my right eye which was routine with no complications. Now the vision in my right eye is getting fuzzy and my ophthalmologist
recommends a laser posterior capsulotomy to improve my vision

**Facts About Cataract National Eye Institute**
April 26th, 2019 - You and your eye care professional can make this decision together. Once you understand the benefits and risks of surgery you can make an informed decision about whether cataract surgery is right for you. In most cases delaying cataract surgery will not cause long term damage to your eye or make the surgery more difficult.

**What Are the Risks of Cataract Surgery**
VisionAware
April 27th, 2019 - All surgery entails risk. Fortunately with favorable outcomes at approximately 98% cataract surgery is highly successful. There is still potential for serious complications however some of which can result in pain, permanent loss of vision or even loss of the eye. Dr. Turner is a staff member.

**Cataract surgery Wikipedia**
April 28th, 2019 - Cataract surgery also called lens replacement surgery is the removal of the natural lens of the eye also called crystalline lens that has developed an opacification which is referred to as a cataract and its replacement with an intraocular lens. Metabolic changes of the crystalline lens fibers over time lead to the development of the cataract causing impairment or loss of vision.

**Age related cataract The Lancet**
April 25th, 2019 - Cataract opacification of the lens is one of the commonest causes of loss of useful vision with an estimated 16 million people worldwide affected. Several risk factors have been identified in addition to increasing age—genetic composition, exposure to ultraviolet light and diabetes. However no method to halt the formation of a cataractous lens has been shown to be effective.
About Us Jaffe Eye Institute Cataract Surgery
April 13th, 2019 - A few years later Dr Jaffe wrote a book entitled Cataract Surgery and Its Complications published by C V Mosby in 1972.
